

## Quick guide on how to install the app on your mobile devices

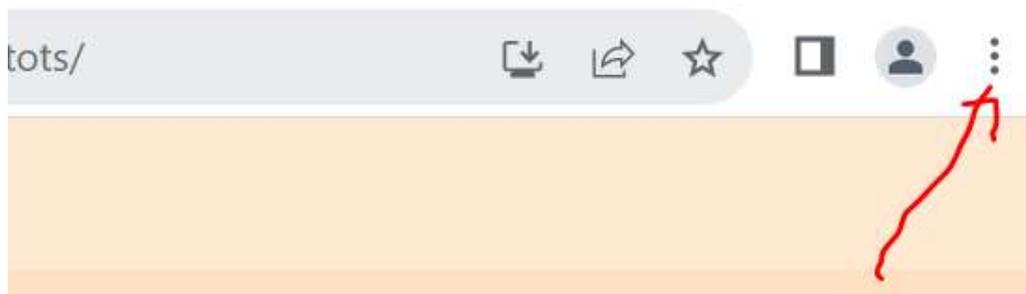

1. Visit <https://kimotasciencecollege.com.ng>

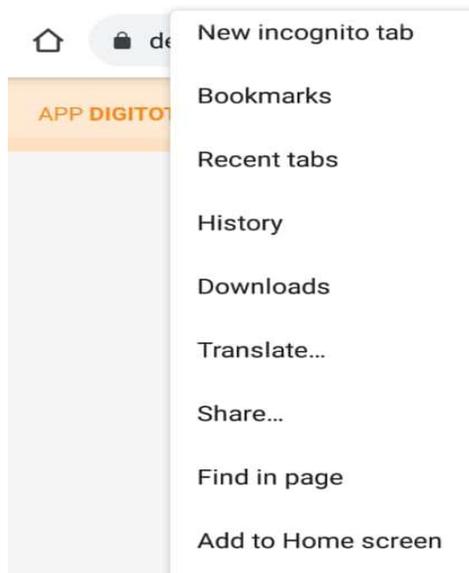

Click on **Install**

On getting to the address, “**Add Kimota to Home screen**” will appear automatically. If it however does not appear, don’t worry.

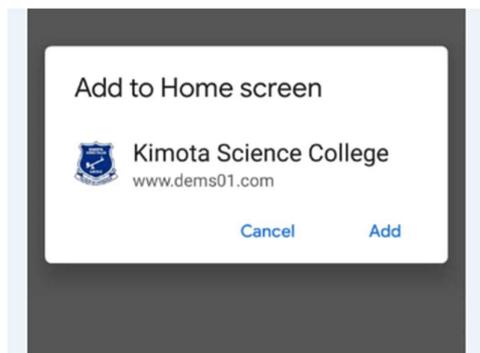

Click on the three vertical dots to the right of the address bar as shown in the image above. Once you do that, you should have this:

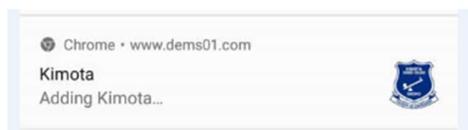

Click on **Add to Home Screen**

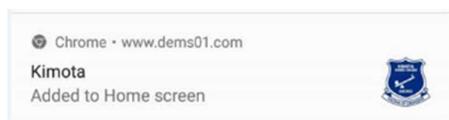

That should take us a step further as shown below

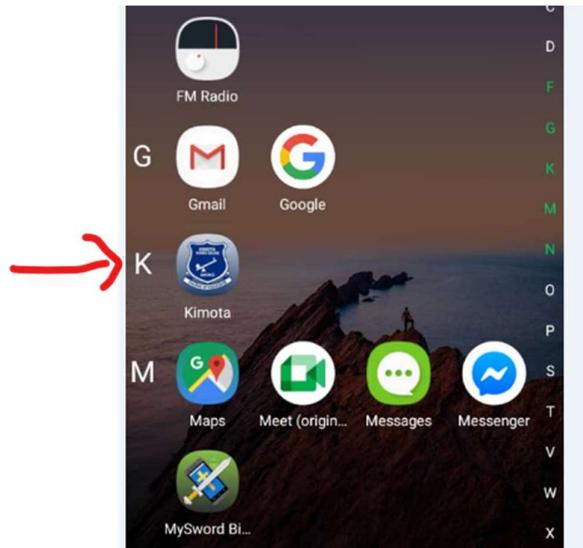

Next click on **Add**. That should again take us a step further as shown below

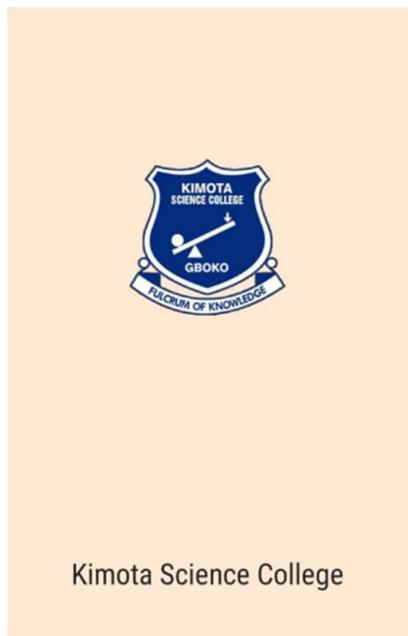

As seen above, the installation has begun and will take some second to be completed. Once done it will indicate **Added to Home screen** as shown below

At this point, the app should be among the list of install apps on you home screen. For instance:

As you can see here, the app is ready to lunch. Like every other app, to lunch, tap on it

The app is lunching and once it is all set, we have,

## LOGIN TO DEMS

Enter your credentials below

USERNAME

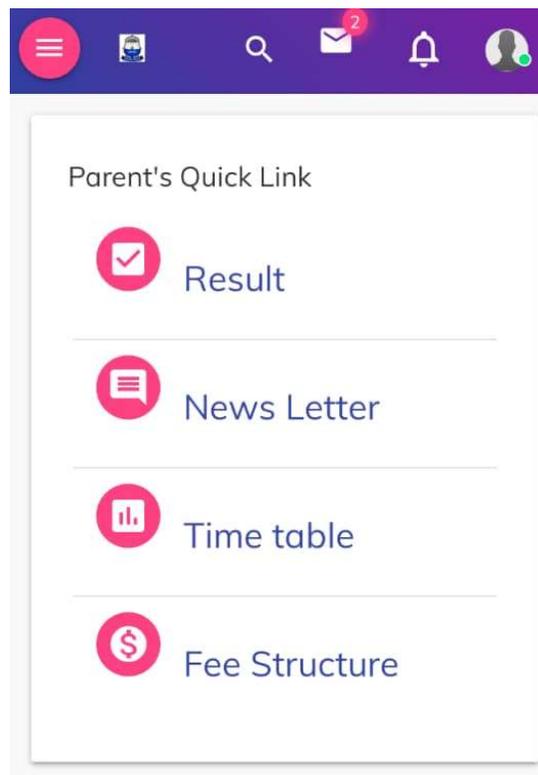

PASSWORD

[I've forgotten my password.](#)

**LOG IN** →

On first login, you need to supply your username and password which is your ID (given by the school either through SMS or other means). After the first login to the app, you don't need to login again (except if you deliberately logout from the app).

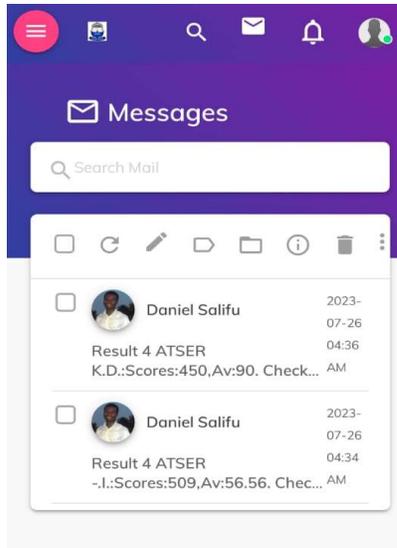

If you have your ID and you login then your profile will look like this

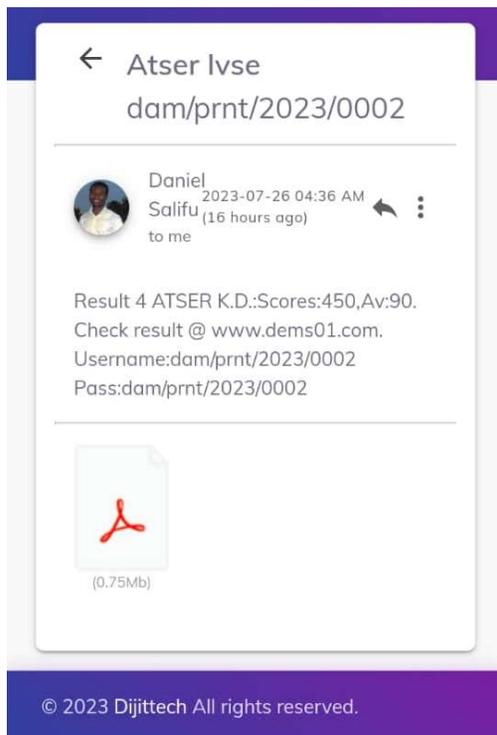

This app is aimed at addressing a number of challenges. Top most is to address the need for communication back and forth (school to parents, parents to school etc). This can be in form of notifications, messaging etc. Result is one of such. In the future, when you make payment

or do anything with the school that needs feedback, it will come to you inform of a message directly to you (this includes payment receipts etc).

As you can see, the user above is having two personal messages. If you click on it, we should have this.

Next, you read the individual (personal) message, by clicking on it. Let's click on the first one

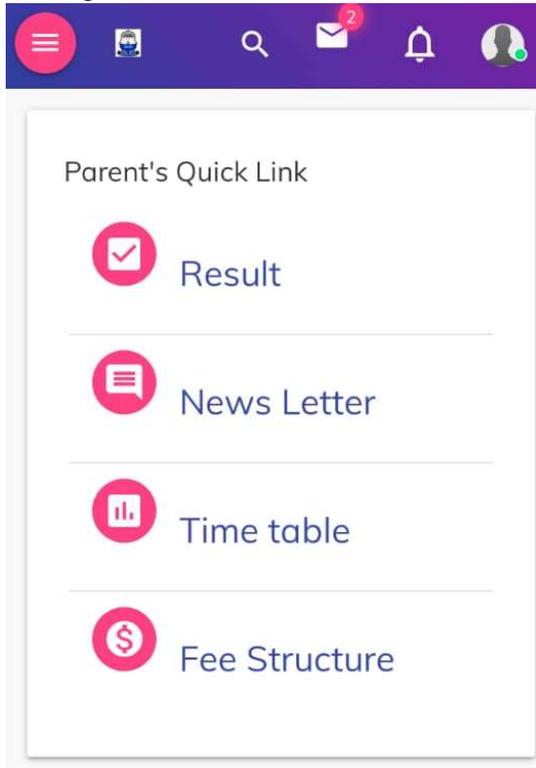

As you can see here, clicking on the message brought us here to see the details. On result messages and payment receipt messages, you will normally see the icon at the bottom which

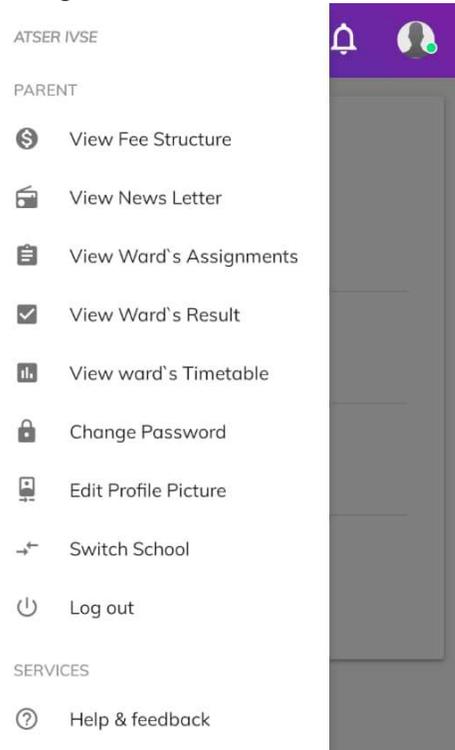

when clicked, should take you straight to the result or receipt (without needing to go through the stress of further actions)

**Note:** The explanations above is not the standard way of checking results.

1. Image one

2. Image two

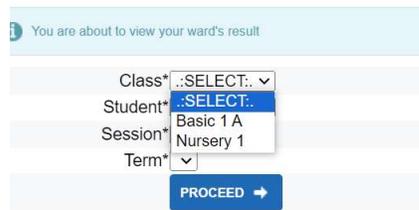

**Image one** above reveals quick link for parents to check result among others. When you click on  in **Image one**, you get **image two**.

To check result, either click on **Result** or on **View Ward's Result**. Either way we will get the page below

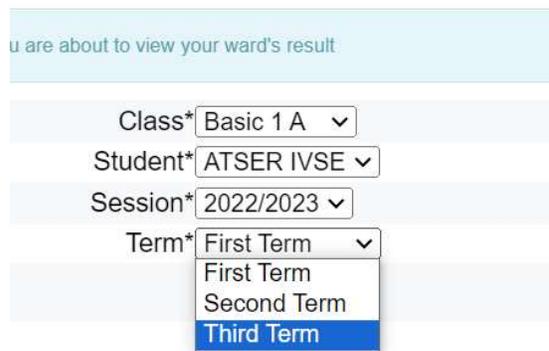

A screenshot of a form for selecting a student's result. At the top, a light blue banner contains an information icon and the text "You are about to view your ward's result". Below this are four dropdown menus: "Class\*" with a "SELECT.." option, "Student\*" with a "SELECT.." option, "Session\*" with a downward arrow, and "Term\*" with a downward arrow. At the bottom of the form is a blue "PROCEED" button with a right-pointing arrow.

Select the class, student, session and term. It is possible you are having children who are in different classes (the mapping has been done properly). For such parent their class selection will reveal the different classes

The screenshot shows a form with a light blue header that reads "You are about to view your ward's result". Below the header are four dropdown menus: "Class\*" with a "SELECT.." option, "Student\*" with a "SELECT.." option and "Basic 1 A" selected, "Session\*" with "Nursery 1" selected, and "Term\*" with a dropdown arrow. A blue "PROCEED" button with a right-pointing arrow is located at the bottom right of the form.

You just need to check one after the other. If we select Basic 1 A and other selections appropriately, we should have

The screenshot shows the same form as above, but with the following selections: "Class\*" is "Basic 1 A", "Student\*" is "ATSER IVSE", and "Session\*" is "2022/2023". The "Term\*" dropdown menu is open, showing three options: "First Term", "Second Term", and "Third Term", with "Third Term" highlighted in blue.

Please make sure your selections are appropriate. Don't select First or Second term when you are to select Third term. After the selects, click on the **proceed** button to continue. The result should display automatically and you should also see the display below on the main page.

The image shows two banners. The top one is light blue with an information icon and the text "You are about to child's/ward's Result". The bottom one is yellow with a warning icon and the text "If result does not display automatically, [Click Here] [Annual Result]".

**Click Here** should enable you view the term's result while **Annual Result** should enable you view the annual result.

Note: This is just a quick guide to enable us proceed with checking of results and not full explanation on how the app works. That will hopefully come up in the future.

**Note: when logging in, make sure your ID is all in lowercase (not capital letters)**
